Looking to transition into a Data Science/AI role leveraging my background in Application Support and recent hands-on experience in machine learning and AI projects.

Professional Summary

Detail-oriented Application Support Engineer with 2.7+ months of experience at Crest IT (Client-Axis Bank), and a strong foundation in supporting banking applications. Currently upskilling in Data Science with Generative AI, having completed the Python with hands-on experience in data analysis and visualization using Pandas, Matplotlib, and Seaborn. Published an end-to-end 3 app and website on GitHub and deployed in Render & Streamlit.
